

GIVI Trekker Cases

Available in three versions, with capacities of 52 LT (TRK52N), 46 LT (TRK46N) and 33 LT (TRK33N), the new TREKKER cases are the best solution for bikes equipped with exhaust pipes only on one side. By affixing the smaller bag to the side with the exhaust pipe, and the larger one on the other, in many cases you can solve the issue of asymmetry (a problem that you might find using traditional side bags). Thanks to special selectors placed inside the bags, you can convert each version either to fully open the entire lid or only the uppermost smaller opening (very practical for quickly accessing items from the bag). Elaborately trimmed in steel foil, these bags are not necessarily specific to just Enduro bikes, but can also be a luxurious accessory on elegant bikes. This peculiar diversity sold in a single unique package, combined with its ability to be used as a top case on the Monokey plates, gives to the customer the opportunity to choose the best combination to mount to the bike in order to suit his/her space needs.

Doesn't fit on the original BMW top case / side case mounting. You also need the GIVI top case / side case mounting. See our product "Top case mounting" or "Side case mounting"!

Note: It is possible to retrofit up to three GIVI cases (side cases / top cases) with the same lock, so that only a single key is required to open and close the different cases. This 3-piece lock set can be ordered under item number SL103. The locks must be replaced by the customer.
