

Two-piece Load Restraint Assembly

Consisting of one tie-down strap with S-hook and a complementary tie-down strap with S-hook and tensioning ratchet

* Length: 3.5 m

* Width: 25 mm

* Tensile strength: 130 kg

* Break point: 390 kg (EU standard 12195)

The break point of a lashing is tested by applying a gradually increasing weight. The weight at which the lashing ultimately breaks is recorded.
