

Crash bars stainless steel

These stainless steel engine guards will never rust like powder coated steel guards. They are carefully designed to allow clearance for oil changes or valve cover access, so they never need to be removed. Guards attach to the engine mounts not the engine covers to protect the engine heads and not destroy them. Integrated top brackets on each guard allow the rider to mount accessory lights, video cameras, or whatever they can imagine!

BMW R1200RT 2005-2009

Install instruction

Crashbars offer a very good protection, but they can reduce the cornering angle.

Also referred to as engine bars, highway bars.
