

AirMan Sparrow Air Pump

The AirMan Sparrow air pump can also be used for cars and trucks although it is very small. The plug will fit in any BMW accessory socket and standard cigarette lighter power socket. It has a built-in pressure gauge and an on/off switch.

The power cord is eleven feet long. The AirMan Sparrow air pump is a light and compact unit. The gauge is accurate and easy to read. Most bicycle tires can be filled in under one minute, most car tires in about seven minutes. Filling a motorcycle tire will lie somewhere in-between.

In most cases, the Canbus system shuts off the power of the electrical outlet when the compressor (Airman) is connected. You can only fix this with our accessory socket (part no. 90025), which is directly connected to the battery.

TECHNICAL SPECIFICATIONS

Airflow: 15.0 – 18.0 L/min

Maximum pressure: 75 psi

Net weight: 600 g

Dimensions: 12.0 x 6.0 x 14.2 cm

(2-3/8" x 4-3/4" x 5-5/8")

Art-Nr.: C74-Airman
