

Brake pedal enlargement

It is important to be able to find the rear brake pedal when you need it! This enlargement made of aluminium substantially increases the size of the pedal and provides a greater margin of safety and level of comfort. The special surface leads to very good grip. Fits for R 80/100 GS/PD. Fixation with two screws, two washers, two lock nuts.

Also referred to as brake pedal enlarger, brake pedal extension, foot brake lever width extension.
