

Flasher Relay

12-pin electric relay for turning signals. When using LED indicators, this relay will automatically adjust to the power of the turning signals to ensure the correct flashing rate (1-100 Watt) or for simple exchange of the original relay!

No automatic turning signal cancellation!

Fits for:

K1200LT 99-* (89V3; 0545,0555)

Attention: Once the parts have been installed, they cannot be returned!

Art-Nr.: WLR-05
