

Motosyte synchroniser machine

A correct and proper synchronisation (for 4 cylinder) of the carburettor or the fuel-injection system is very important for perfect engine running: smooth engine running, excellent response, no vibrations, optimal mileage and less wear.

We tested the Motosyte synchron machine with all most all BMW 4 cylinder motorcycles and we were surprised how fast and precise every small adjustment of the carburettor or the fuel-injection system was shown on the display. Our rating: Very good!

The Motosyte synchron machine is

- * usable on almost every engine
- * suitable for fuel injection and carburettor
- * applicable for any number of cylinders
- * tune with the highest precision
- * electronic, there are no moving parts
- * free of Mercury, springs or weights
- * its works regardless of the atmospherics

The set contains:

- * 1x Motosyte synchron machine
- * 4x petrol strong elastic hoses
- * 4x connecting nipples, 5 mm
- * 4x connecting nipples, 6 mm
- * 4x 1,2 volt brand block battery
- * 1x German User Manual
