

Carbon Hand Guard right

Our hand protectors made of carbon fiber for the R 1200 GS from 2013 & Adv. LC are designed to hold coldness and rain better away from your hands and fingers. They are a bit bigger than the original hand guards, but the new design doesn't make them look bigger.

The hand protector in carbon for the BMW R 1200 GS (LC) is a direct replacement for the original component.

Also referred to as hand protectors, hand guards, barkbusters, bark busters, lever guards
