

Wilbers Suspension type 642 G650 X Challenge

The 632 and 642 series shock is ideal for Competition use and also serves as many applications for road usage. These have lots of unique special parts including a 46mm radial flow piston, induction hardened shaft and (LLT) Long term tech seal head. There's plenty of scope for adjustability with high and low speed compression damping adjustments of 22 clicks each along with a minimum of 22 available rebound settings.

Wilbers Suspension rear with external compensating reservoir.

All our Wilbers suspensions are specially tuned to your requirements!

Therefore, please give us the following data in the comment of your order:

- rider weight with clothes and helmet in kg
- loading weight in kg
- passenger weight with clothes and helmet in kg
- how often do you have a passenger? (in %)
- payload (if you have a passenger with you) in kg
- purpose (road, terrain, racetrack)
- driving style (Sporty, tours, off-road)
- color of the spring: Sport Line (blue) or Classic Line (black)
