

## Brake disk non-perforated

Brake disk non-perforated for BMW R2V Boxer first series of /6 models, R 75/6, R 90/6 and R 90S until 09/1974.

Original design, state-of-the-art technology, more safety: The legendary riveted brake disk is enjoying a comeback. It uses the current technical possibilities to combine the charm of days gone by today's demands for function and safety in harmony. The disk itself is made of high-strength, heat-treated chrome steel alloy. It is riveted in the original method. For clearly improved braking and clean concentricity, the brake disk is circular grinded.

With operating permit certificate (ABE).

Originally for BMW R 75/6, R 90/6 and R 90S until 1974.
