

Front Brake Discs Rivet Pack

Cool design, the finest high technology, with TUV, and all for an affordable price. After extensive testing and successful application in motor sport, we're introducing the new Lucas Alien brake disc to the marketplace. The Lucas brake discs are eye-catching at first glance, but behind the elegant design there is really solid performance. The basic material used for the Lucas brake disc is a high-strength steel alloy to the standard 35 HRC.

Scope of delivery: 1 brake disc

Rivet Pack: We now supply riveted discs with permanently riveted floaters for these motorcycle models. The brake discs correspond to the original brake discs. This innovation allows you to save on working time. These brake discs are available with grooved outer contour (Alien, RAC) or with the classical circular friction ring.
