

Touring screen

The touring shield has the same shape as the original, but with an additional raised wind deflector at the top, covering the entire width. This deflects the wind over the rider and allows a relaxed ride, particularly on longer trips.

Also referred to as windshield, windscreen, shield, screen.

Length 450mm, width 360mm.

ATTENTION: Only for models with short windshield holder. Does not fit in combination with the original BMW windshield adjustment! In picture 4 you can see the hole spacing for the short windshield holder. Please compare these dimensions with your motorcycle!

Touring screens for the adjustable holder can also be found in the windshields category.
