

## USB socket with On/Off switch

The specially designed USB socket (max. 2,1 A) sets the input voltage from 12V to 5V USB standard. The housing (IPX3) with 1.5 m cable with battery terminals and fuse allows flexible mounting on the handlebars or tubing string with cable ties. A special feature is the comfortable spring cover. The integrated switch On/Off prevents continuous power consumption of the socket, which is indicated by a operation LED.

Optional accessory: 61-44201 is developed for socket mounting without cable ties with a slim screw holder for tubing string and handlebars 22-28 mm.

- Automatic spring cover
- Flexible mounting with 1,5 m cable
- With On/Off switch and LED
- Fuse and fuse holder included
- Optional bracket 61-44201 available

Dimensions (L x W x H): 60 x 42 x 38 mm

Cable: 1500 mm

Ring connector: 6 mm
