

Additional LED Lights

This LED auxiliary headlamp kit (including crash bar mounting 23-25mm, special cable harness) assures daylight-like illumination at night thanks to the newest LED technology. During daytime, it guarantees enhanced safety by improving the visibility of the motorcycle for other road users. The roadside will also be illuminated by the extra wide light beam. The additional lights are equipped with high-performance LED chips and an aluminium case for a long lifetime. Due to the sealed housing, the lights are 100% waterproof according to the IP67 standard. The crash bar mounting permits to mount the lights on tubes with a diameter of 23-25mm. The color of the switch (image 5) may vary.

Dimensions LED light: diameter 57mm, depth 105mm

- Voltage supply 9-30 Volt, 40 Watt, light output 4.000 Lumen, light colour 6.000 K
- Shipment includes: 2 LED lights, 2 mounting kits for crash bars 23-25mm, special cable harness with switch (wiring diagram)
- with ECE homologation

Important: The installation requires knowledge of the motorcycle electrics, if in doubt, have it installed by a specialist workshop!

With our mounting kit (part no. LS5113), you can mount our additional lights even if you do not have any crash bar on your BMW R1200RT LC.

Note: The fixation clamps are also suitable for a pipe diameter of 27mm. All you need to do is use a M6x50 Allen screw (instead of the supplied M6x45).

If the plus cable of the headlights is too short for your motorcycle, you can extend it with our item S23004138. Our cable ties (item 3800105 / 3800115) are also helpful for mounting the headlights.
