

Battery charger Optimate 4 Quad Program

90018

Item 90018: Battery charger Optimate 4 Quad Program with a plug for the BMW on-board socket

Item 90016: Battery charger Optimate 4 Quad Program without plug for the BMW on-board socket, but with a cable that you can connect directly to your battery for easy charging without removing the battery

Battery charger Optimate 4 Quad Program, 1.25 A, 9-stage 12V / 12.8 V protection, test, trickle charger TM-630, for lead, AGM and lithium iron phosphate batteries

The charger is suitable for mains voltage of 100V-240V at 50-60Hz.

Optimate 4 Quad Program, for the ultimate maintenance of the high-tech 12V/12.8V battery in your adventure, touring, cruiser or racing motorcycle or ATV, side-by-side and personal watercraft - the world's most advanced motorsport battery charger!

Quad Program: Select Program 1 or 3 to charge the battery directly or by means of a live (hot) 12V socket, or Program 2 or 4 to charge by means of a BMW CAN-bus controlled 12V socket. To do this, the charger must be ordered with the appropriate cable.

Fully automatic multi-stage program brings the battery safely to full charge. Select battery type and charging needs, the Optimate 4 Quad Program does the rest, no monitoring required!

- For all 12V power sports battery types, including Lead-Acid (Pb) > STD (with fill caps), AGM & GEL (sealed VRLA) and Li-Ion, manufactured with LiFePO4 / LFP technology
- BMW Motorrad CAN-bus compatible, automatic activation
- Intelligent desulphation from 0.5V, for lead batteries
- Can easily stay connected, full electronic protection
- Maintains full charge and battery health
- Low voltage recovery and BMS reset, for LFP battery
- Tests battery health, energy saving technology
- Standby power below 0.5W
- Efficient 24/7 battery maintenance
- Weather resistant: can still be used at -40°C / -40°F
