

Garmin Zumo XT2 Europe

The Zumo XT2 navigation device with its 6 inch (15.2 cm) touch display is very easy to read even in strong sunlight, can be used in both portrait and landscape format and can also be operated in the rain and with gloves. Thanks to Bluetooth technology, you can make phone calls at any time when combined with a Bluetooth-enabled helmet or headset.

- particularly bright HD color display that can be operated even in the rain and with gloves
- robust and waterproof (IPX7)
- pre-installed road maps for all of Europe and the Middle East and free map updates
- maps of Africa (including Tracks4Africa), North/South America, Australia and New Zealand can be downloaded from garmin.com/express
- pre-installed topographic maps for perfect off-road driving fun
- easy switching between road maps, topographic maps and satellite images
- Tread App compatible, including Group Ride Mobile
- Garmin Tread App: paired with the Tread App on your smartphone, the Zumo XT2 navigation device can display live weather, smart notifications and more. Synchronizing waypoints, tracks and route data across all devices, visual route planner for individual routes, sharing and importing GPX data, tracking the position of friends on the sat nav or smartphone with Group Ride Mobile and trip summaries with data such as acceleration, G-forces, speed and more are also possible via the app.
- Garmin real-time services for traffic, weather and gas station prices
- Garmin Adventurous Routing: winding and mountainous road routes in four different levels of difficulty
- easily send GPX files from your smartphone to the Zumo XT2 and quickly share GPX files with other drivers via the Garmin Tread App
- MICHELIN Green Guide: the pre-installed travel guide from MICHELIN shows where it is worth stopping with pictures, detailed descriptions and reviews
- MICHELIN Scenic Roads: use the visual route planner to build unforgettable tours into your trip in advance or spontaneously follow the green route on the map
- visual route planner: individual route planning directly on the navigation system or in the Tread App on the smartphone
- automatic accident notifications with the current position data via text message via the Tread App and the mobile phone connection to previously specified contacts

- inReach compatibility: pairing the navigation system with a separately available inReach device with an active subscription to use two-way satellite communication and interactive SOS directly via the touch display
