

Universal seat cushion

This universal seat cushion improves riding comfort by reducing the strain on the back and buttocks, making for a more relaxed and pleasant ride. The soft, inflatable TPU inner pad is covered with breathable, black fabric and offers optimal seating comfort. Thanks to the two integrated valves, the air pressure can be individually adjusted to optimize seating comfort according to personal preferences.

Two straps that pass under the motorcycle saddle and are fixed with a CAM hook ensure secure fastening. The non-slip underside also ensures a stable hold on the saddle. The cushion is suitable for riders weighing up to 130 kg. This practical accessory makes long motorcycle tours even more comfortable.

Length: approx. 38cm

Width at the back: approx. 35cm
