

Smartphone support Quiklox for handlebar clamp M6/M8

92248
+
93054

With this smartphone holder (item 92248) you always have your mobile phone close at hand and clearly visible on the motorcycle. The holder is compact and can be quickly attached to and removed from the handlebar clamp or the clutch / brake fitting.

The Quiklox support for the handlebar clamp has an M6/M8 fastening screw that can be fastened in an M6/M8 thread. Please check whether your motorcycle has a corresponding M6/M8 thread!

In addition, the Anti Vibration Module (item 94173) and the Quiklox smartphone case Armor Hard Case (item 94361) or the Quiklox universal smartphone support (item 93054) are required to attach the smartphone.

The Anti Vibration Module (item 94173) protects your mobile phone from high-frequency vibrations generated by the motorcycle.

The Quiklox smartphone case Armor Hard Case (item 94361) is very robust and offers the mobile phone protection against bumps, falls and rough weather conditions. A charging cable can also be used with the smartphone case. The internal dimensions of the case are 83 x 168 mm. Can be used horizontally and vertically.

With the Quiklox universal smartphone holder (item 93054) phones with a width of 65-90mm can be attached. Can be used horizontally and vertically.

Simply push in the quick release, turn it and attach or remove the smartphone holder together with the smartphone - easy and safe.
